Code	457
Status	Active
Adopted	August 9, 2021
Last Revised	February 20, 2023
Last Reviewed	July 8, 2024

Suicide is a major cause of death among youth in the United States, especially in the State. Suicide is preventable and in light of state law requirements, the District shall operate a community-based, school-focused suicide prevention program. The goal is to educate students, families, and school staff on how to recognize and intervene in potential suicidal situations. The District's suicide prevention program has three elements – prevention, intervention, and postvention, and shall be carried out in accordance with established procedures.

General Framework

With the goals of promoting students' well-being, intervening with students who may be identified as struggling or in crisis, reducing actual or attempted incidents of youth suicide and other forms of self-endangerment, and responding appropriately to any such incident that has a connection to the District, the School Board directs the administration to address youth suicide prevention and intervention through a multi-faceted approach that includes at least the following components:

1. Initiatives to increase staff awareness of issues related to youth suicide, including, at a minimum and as required under state law, providing annual notice to the District's licensed staff of the suicide prevention resources and services that are available through the Department of Public Instruction.
2. Additional periodic professional development opportunities for appropriate staff, as determined by the administration, that relate to youth suicide prevention and intervention. Such opportunities may be voluntary or required and may be provided internally or through external sources.
3. Age-appropriate instructional programming for students in the area of personal development that, as required under state law, is designed to address matters such as instruction that addresses the causes and signs of suicidal ideation/tendencies or other forms of self-harm, knowledge of the relationship between youth suicide and the use of alcohol and controlled substances, and knowledge of youth suicide prevention and intervention services that are available in the community.
4. The incorporation of services and resources that address student mental health needs, positive social and emotional development, and suicide prevention and intervention within the District's approach to providing guidance and counseling programs and services for students.
5. The incorporation of suicide intervention and response components within the District's crisis intervention and response procedures.
6. The identification of and, where feasible, the engagement of cooperative efforts with relevant agencies, community organizations, and other experts.

Assignment of Responsibility

The Director of Student Services shall have primary administrative responsibility and accountability to the Board for overseeing and coordinating the District's approach to youth suicide prevention and intervention in a manner that is consistent with the above-identified general framework and the specific mandates found in state law.

State Civil Liability Exemption

State of Wisconsin encourages attempts to intervene in and prevent youth suicide by providing that the School Board and any District officer, employee, or volunteer who in good faith attempts to prevent suicide by a student is immune from civil liability under state law for his or her acts or omissions in respect to the suicide or attempted suicide.
